★

GENERAL INFORMATION

TERMS—CASH WITH ORDER, PLEASE.

PRICES ARE NET.

If you live in West Virginia kindly include consumer's sales tax with your order.

PLEASE NOTE: Figures in parenthesis following the name and type of a variety indicate the size of the bloom as they grow for us. * All dahlias marked with asterisks are of European or Australian origination. We have imported them from the various countries in recent years.

Orders of \$2.50 or more are postpaid. For less than \$2.50, please add 25c for postage and packing.

PLEASE STATE SHIPPING DATE. All orders will be well packed and all roots are guaranteed true to name and in growing condition. If unsatisfactory upon arrival, or if they fail to start in a reasonable time, return at once and they will be replaced. However, very early shipments are sent at customer's risk of freezing, drying or rotting. We are not responsible in any case for more than purchase price.

May we suggest that if you are ordering more than three roots of a variety, will you kindly write us before sending your order in to ascertain if we have them in stock. Almost every year there is a shortage of certain varieties.

WE SUGGEST THAT YOU SEND IN YOUR ORDER FOR DAHLIAS EARLY. All orders will be filled in rotation. We shall be glad to reserve your roots for you and ship at any time that you desire. To save time and possible disappointment and extra correspondence, may we suggest that you make a second choice of roots when ordering.

Roots to be mailed March 1st to June 1st. Plants any time after May 15th.

ONE FREE ROOT OF OUR SELECTION GIVEN WITH EACH ROOT ORDER. With a few exceptions, this has always been our policy and we are glad to do it. This does not apply to plant or wholesale orders.

Our gardens have been state inspected and have been found to be free of dangerously injurious insects and plant diseases.

Spray your dahlias for best results. Leafhoppers are the principal offenders in our locality. Try spraying with D.D.T. or Methoxychlor every ten days after they come up for a while and see if they do not do better for you. We used Methoxychlor last season to control Mexican Bean Beetle and Japanese Beetle with excellent results. It is much less poisonous than D.D.T. Follow directions on the can.

To all we extend a cordial invitation to visit our gardens during the growing season and blooming period.

Our gardens are located five miles east of Fairmont, one mile off State Route 73, on the Winfield Road at the village of Winfield.
